MY SPECIAL NEEDS

We all have needs, and each one is special.

This is not just a product catalogue. It is an attempt to **meet the needs we all have**, from the time we get up in the morning to when we travel.

We want to put people - no longer tourists - at the centre. Behind every tour there is a person, just as there is within every traveller.

People meeting people.

For us, **each person is as special as their needs**: to have fun, disconnect, change the point of view, or experience an unforgettable moment.

VISIT VERONA GARDA MY SPECIAL NEEDS

Discovering

How many times have we felt the need to discover something, someone, who we are, what we want to be?

Moving

Sometimes we cannot sit still; we need to go and find out how to move - sometimes following directions, other times by instinct.

Having fixed points

Sometimes we need references, even when we are following our own path.

Experiencing things from multiple points of view

How do I know the meaning of something if I don't see it from many directions, following someone, listening to something?

Looking from above

The astronauts call it 'Overview Effect', a cognitive change perceived by looking at the Earth from space for the first time. How many times have you had the opportunity - or the desire - to expand your horizons?

Looking upwards

Too concentrated on our road, we miss what the world has to show us. We just need to lift our gaze a little higher.

LET YOURSELF BE INSPIRED AND
EXPERIENCE SOMETHING NEW

Scan me

Trying something special

We have often told ourselves this, at an anniversary, an important moment, or simply because we want to.

Exploring other roads

The desire to change is human, but how many times have you actually done it, or even thought about it, or done it for life?

Doing something now

Ready, set, go. Don't think about it too much. Sometimes instinct tells you the right choice. Carpe diem!

Taking time

Sometimes you want to think about it, reason, not be disturbed. Even doing nothing is a choice.

Finding the road again

To learn where to go, sometimes you have to get lost. You just need to know how to get home, or whatever each of us calls home.

And you? What special needs do you have?

Experiencing things from multiple points of view

Crossed by the **Adige River**, which gives the city a magical, romantic atmosphere, Verona is one of the most fascinating art cities in Italy. Its history stretches back more than two millennia and it is the richest - after Rome - in remains from the Roman era.

Its symbol, the Arena, hosts the world's most important opera festival — the living expression of an art that UNESCO recognized as an Intangible Cultural Heritage of Humanity in 2023.

It forms part of and oversees the **Great Wine Capitals** network, which encompasses 12 of the top cities and territories in the world of wine.

It is located in a strategic position: it is less than two hours from Milan, Venice, Bologna, the sea, and the Dolomites.

It is a **people-sized city**, almost entirely flat, except for a few panoramic points that reach an altitude of 400 m. The advantage? You can always move around sustainably!
